

Map My Family Tree

Progeny Genealogy, New Minas, Nova Scotia

*Presented by - David Walker
To - Ottawa TMG Users Group*

4 February 2017

Introduction

Map My Family Tree is a product from Progeny Genealogy, located in New Minas in the Annapolis Valley, Nova Scotia.

Map My Family Tree geocodes all events, including custom events, recorded in your genealogy software, and displays their location on a world map.

Introduction

MMFT is able to read the native files of several genealogy software titles, such as TMG, Family Historian, Legacy Family Tree, Personal Ancestral File, RootsMagic. It can also accept GEDCOM format.

Warning: Progeny states that Map My Family Tree will extract data from native files of several software titles. However, as far as TMG is concerned, it only works with v.5.0 or earlier. The only recourse is to create a .ged file.

A Case Example

Suggestion: Before running the geocoding process, go to Preference and make changes as you wish, otherwise you will have to run the process again.

A Case Example

MMFT does not make any changes to your file. However, if you choose to access the native file, rather than a .ged file, make certain the genealogy program is not running.

A Case Example

Click on Edit > Preferences > Audit Options

A Case Example

This is the default window for Audit Options. I left it without changes.

A Case Example

On this default window the only change I made was to check 'Misspelled places'

A Case Example

On the window for Gazetteer Options I selected 'Decimal Degrees, as this is the format used for TMG and Second Site.

A Case Example

From your TMG Export folder select the file to be processed.

A Case Example

The first step for MMFT is Load File,
then Gathering Places, then Geo-coding
with the included Gazetteer

A Case Example

How long does it take to geocode your data file? The product description states that it takes seconds - that would be seconds for each place.

My TMG file has 162,777 distinct places. It took about 2 hours to complete the geocoding process.

A Case Example

Geocoding in progress.

A Case Example

Geocoding completed.

Map Display Choices

Alternate map choices include MapQuest, Google Maps and Google Earth. I could not get TerraServer USA to connect.

Map Display Choices

North Wallace, Cumberland County, Nova Scotia, shown with the vector-based map provided with MMFT.

Map Display Choices

Select a place, then select MapQuest from the Gazetteer drop down menu

North Wallace, with coordinates, shown with MapQuest

North Wallace, shown with Google Maps, marked with a red pin.

North Wallace shown with Google Earth, marked with a red 'x'

Map Styles

Select Map > Map Styles

A wide variety of options are available to create a map style to your liking.

Time Scrolling

By default all events from all time periods are displayed on the map.

Time scrolling allows one to dynamically select a time period to be displayed on the map.

Time Scrolling

From the top menu bar, select Map, then Time Scroll Options

Time Scrolling

Enter the start and end
years to be shown

Enter the time span

Click OK

The image shows a dialog box titled "Time Scroll Options" with a red close button in the top-left corner. It contains three input fields: "Start date (years)" with the value "1800", "End date (years)" with the value "2017", and "Time span (years)" with the value "40". Below these fields is a checked checkbox labeled "Show towns outside time span". At the bottom of the dialog are three buttons: "OK" (highlighted in blue), "Restore", and "Cancel". Red arrows point from the text on the left to the "Start date", "End date", "Time span", and "OK" fields.

Field	Value
Start date (years)	1800
End date (years)	2017
Time span (years)	40

Show towns outside time span

Buttons: OK, Restore, Cancel

Time Scrolling

Click on the Time Scroll button to activate or deactivate this feature.

The blue scroll bar represents the time span entered previously, 40 years

Time Scrolling

The screenshot shows a web-based map application interface. At the top, a menu bar includes 'File', 'Edit', 'View', 'Gazetteer', 'Map', 'Filter', and 'Help'. Below the menu is a toolbar with various navigation icons. A date range '1800 - 1840' is highlighted in a red box. The main map area is titled 'Nova Scotia, Canada' and shows the province with numerous red dots indicating events between 1800 and 1840, and white dots for events outside this range. Labeled locations include Lorneville, Linden, Amherst, Maccan, North Wallace, Tatamagouche, Athol, Wentworth, Brierly Brook, Southampton, Five Islands, Londonderry, Truro, Lansdowne, Kentville, Walton, Upper Stewiacke, Windsor, Falmouth, Fair View, Halifax, Yarmouth, Sydney, and Glace Bay. A scale bar at the bottom left shows distances from 0 to 200 km. On the left side, a sidebar lists geographical categories: World, Unknown places, Ambiguous, Events without a place, Canada, Canada [NON-SPECIFIC PLACE], Ambiguous, Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia (highlighted), Ontario, Prince Edward Island, Prince Edward Island [NON-SPECIFIC PL], Prince Edward Island, Canada [NON-SPI], Prince County, Queens County, Quebec, Saskatchewan, England, France, Germany, India, and Ireland.

Once Time Scrolling is activated, and a place selected, the first range of dates appears. In this example, Nova Scotia was selected. The red dots represent those places where events occurred between 1800-1840. The white dots represent those places when events occurred outside of this time range.

1. Broaden the view to the provincial level

Corrections to Place Names

One of the strengths of Map My Family Tree is its listing of problematic place names.

The following list is excerpted from the MMFT User Manual.

Corrections to Place Names

Misspelled Places: Names closely resemble a real place, but are misspelled, or have transposed or missing letters.

Ambiguous: More than one possible result. The program has found some place names that may refer to several different locations.

Wrong Jurisdiction: One jurisdiction or level in the place name belongs elsewhere. In other words, the place exists, but not in that specified location.

Unknown Place: No match found with any official place names in Progeny's Gazetteer.

Incomplete: Has town, but is missing other place levels. The program has found place names that describe a town, but are missing some other information, such as county, state or country.

Non-Specific Places: The program has found place names listed, but is still missing a town.

Missing Commas: The program has found an exact match, but one or more commas are missing. (Example: Aberdeen Brown County OH US should be corrected to show Aberdeen, Brown County, Ohio, United States)

Events without a place: The program has found some events in the data file that have no place name associated with them.

Corrections to Place Names

Kitwee, Zambia was flagged by MMFT as an unknown place.

A quick check with Wikipedia finds that the correct spelling is Kitwe

- World
 - Unknown places
 - Huntingtonshire, England
 - Kitwee, Zambia**
 - New York City (probably)
 - Ambiguous
 - Events without a place
 - Canada
 - England
 - France
 - Germany
 - India
 - Ireland
 - Italy
 - New Zealand
 - Scotland
 - South Africa
 - Switzerland
 - United States
 - Wales
 - Zambia
 - Zimbabwe

Kitwe

From Wikipedia, the free encyclopedia

This article **needs additional citations** challenged and removed. *(September 201*

Kitwe is the second largest city in terms of size and population in [Zambia](#).

Knowing the correct spelling, the next step is to edit the TMG Master Place List.
