

## **TMG Tips and Tricks 10 Jan 2010**

(Based on TMG 7.04)

This came from the TMG mailing list and I have to give credit to Carol Collins.

### **Change default role**

Open Master Tag Type List --> Land --> edit --> Roles and Sentences.  
Added two new roles (buyer/seller), wrote sentences for them and moved them to the top of the list (above Principal 1 & 2).

Well, I added custom Roles to most of my tags and never thought to rearrange the list order. When I add a tag, the role of "Principal" appears first in the Tag Entry window and I have to scroll down to find the Role that I want. Now that I have gone through all my tags and moved Principal and Witness to the bottom of the list, I get the Role that I want right away.
