TMG v.8.08

The following slides consist of text extracted from Bob Velke's messages regarding the release of TMG v.8.07 sand v.8.08

For each displayed fix or new feature I encourage a dialogue in which people will describe their experiences.

Changes & Fixes

Changes & Fixes

* A number of fixes were implemented, largely based on feedback from the TMG-L list, which included:

Changes & Fixes

* A number of fixes were implemented, largely based on feedback from the TMG-L list, which included:

    * Tag Entry - Opening a name tag or relationship tag, then select a different tag type followed by Select resulted in an error message

Changes & Fixes

* A number of fixes were implemented, largely based on feedback from the TMG-L list, which included:

    * Tag Entry - Opening a name tag or relationship tag, then select a different tag type followed by Select resulted in an error message

    * Add a new tag - Open the Tag Type List from Add menu or Tag Box toolbar, select a name or relationship tag type, followed by Select, resulted in an error message

  * Tag Entry - Opening a name tag or relationship tag, then select a different tag type followed by Select resulted in an error message

  * Add a new tag - Open the Tag Type List from Add menu or Tag Box toolbar, select a name or relationship tag type, followed by Select, resulted in an error message

  * Tag Type Definition screen - some cosmetic changes

Changes & Fixes

- A number of fixes were implemented, largely based on feedback from the TMG-L list, which included:

  - Tag Entry - Opening a name tag or relationship tag, then select a different tag type followed by Select resulted in an error message

  - Add a new tag - Open the Tag Type List from Add menu or Tag Box toolbar, select a name or relationship tag type, followed by Select, resulted in an error message

  - Tag Type Definition screen - some cosmetic changes

  - See Bob Velke's messages for v8.07 & v.8.08 for more details

New Features

New Features

* Four main new features deal with Tag Types and Roles

New Features

* Four main new features deal with Tag Types and Roles

    * Tag Type Definition Screen - Four new buttons were added to set the default role for principals and witnesses

New Features

- Four main new features deal with Tag Types and Roles

  - Tag Type Definition Screen - Four new buttons were added to set the default role for principals and witnesses

  - New Projects - The initial first two roles for all standard tag types will be Principal & Witness. This can be changed after the project has been created

New Features

* Four main new features deal with Tag Types and Roles

    * Tag Type Definition Screen - Four new buttons were added to set the default role for principals and witnesses

    * New Projects - The initial first two roles for all standard tag types will be Principal & Witness. This can be changed after the project has been created

    * Tag Entry - Clicking Tag Type from an event tag, making no changes and immediately clicking Select will no longer result in changes to the roles used by that tag
