

Two Significant Additions to the Latest Release of Second Site

v. 4.2, Build 02

David Walker

Ottawa TMG-UG

12 May 2012

Introduction

Second Site is a third party software title specific to TMG, from the creative mind of John Cardinal.

Second Site is an excellent tool to publish your TMG data, whether you intend to create an on-line web site, or sharing your data on CD as an off-line virtual web site.

It provides a different way to view your project, and often reveals errors or inconsistencies in your data.

It can be configured to create a publication that is simple to comprehensive.

Two Important New Features

1. One person page

2. Search User Item

One Person Page

When this option is checked, Second Site adds a script that makes each page display as a single person page, thus avoiding scrolling down a page of 20, 30, 50 etc. people.
